## MASKING

- Masks are optional for all participants at Wolf PAC starting March 14, 2022.
- Any person wishing to remain masked is welcome to do so.
- Masking is still required for all audience members attending productions or showcases at Wolf PAC.
- These masking protocols are subject to change at any time as new information is released.

## VENTILATION, CLEANING, & DISINFECTING PROCEDURES

- Ventilation will be enhanced as much as possible using any or all of the following methods, when available:
  - Opening windows
  - Use of fans
  - HVAC air circulation systems
- The building will be deep cleaned once per week
- All high touch surfaces cleaned and disinfected on a regular basis

## DISTANCING & REASONABLE CONTACT REDUCTION

- Every effort will be made to keep unique groups, or “pods” as independent as possible to encourage reasonable contact reduction and reduce exposure risk.
- Efforts will be made to keep all individuals socially distanced in a space when possible.

## HYGIENE & SYMPTOM MITIGATION

- Anyone who enters Wolf PAC should either wash or sanitize hands upon entry
- Enhanced hand washing and sanitizing will be encouraged throughout activities
- Anyone who enters Wolf PAC must confirm a health attestation of the following:
  - Is your body temperature below 100.1 degrees?
  - Have you been exposed to anyone with COVID-19?
  - In the past 14 days, have you had any of the following symptoms:
    - Cough
    - Fever
    - Sore throat
    - Loss of taste and smell
    - Nausea, diarrhea, vomiting
    - Extreme headache, fatigue, or muscle/body aches
    - Shortness of breath or difficulty breathing
    - Congestion/runny/stuffy nose

# EXPOSURE PROTOCOLS

## WHAT IS CONSIDERED "EXPOSURE"?

You are considered "exposed" to someone with COVID-19 if any of the below qualifications are met:

- You were within 6 feet of someone who has COVID-19 for a total of 15 minutes or more within 1-3 days of them receiving a positive COVID test or when symptoms first appeared (whichever came first)
- You provided care at home to someone who is sick with COVID-19
- You had direct physical contact with the person with COVID-19
- You shared eating or drinking utensils with a person diagnosed with COVID-19
- The person with COVID-19 sneezed, coughed, or somehow got respiratory droplets on you

## WHAT TO DO IF AN INDIVIDUAL IS EXPOSED TO SOMEONE DIAGNOSED WITH COVID-19:

*If the individual is FULLY VACCINATED*, meaning:

Age 18 or older and have received all recommended vaccine doses, including boosters if eligible

OR

Age 5-17 years and completed the primary series of COVID-19 vaccines

OR

If individual has had a positive case of COVID-19 within the past three months:

- **If no symptoms are present:**
  - The individual may continue to attend activities
- **If symptoms are present:**

- The individual may not return to activities until:
  - Five days after date of exposure
  - Negative antigen or PCR test taken from five days after date of exposure

***If the individual is NOT VACCINATED***

- The individual will not be allowed to return to Wolf PAC activities until:
  - Five days after date of exposure and no fever or symptoms
  - Negative antigen or PCR test taken from five days after date of exposure

## **COVID-19 DIAGNOSIS PROTOCOLS**

### **QUARANTINE PROTOCOLS IF DIANOSSED OF COVID-19**

If an individual is diagnosed with COVID-19, that person will not be allowed to return to Wolf PAC until the following criteria has been met:

- Individual is five days from the date of diagnosis and does not have fever or symptoms
- Individual is fever-free for 24 hours (without the use of fever-reducing medication) and symptoms (if present) are improving.
