MASKING

- When outdoors, masks are optional. Any individual who wishes to remain masked is welcome to do so and will be fully supported; however, masks will not be mandatory outdoors.
- When indoors, masks must be worn at all times for individuals ages 2+.
 - Acceptable masks include medical procedure masks and 2-3 layer fabric masks that fit snugly around the mouth and nose with no large gaps.*
 - **In rare circumstances, if these types of face coverings cannot be worn due to a medical or other conditions, please contact the office to make alternate arrangements.*
 - Unacceptable masks include single layer fabric masks, loose-weave fabric masks, masks with exhalation valves or vents, or scarves/ski/gaiter masks.
 - Masks may be removed for designated water, snack, or lunch breaks, with permission, while adhering to proper distancing protocols.

VENTILATION, CLEANING, & DISINFECTING PROCEDURES

September-May Protocols

- Ventilation will be enhanced as much as possible through the use of any or all of the following methods, when available:
 - Opening windows
 - Use of fans
 - HVAC air circulation systems
- The full building will be deep cleaned once per week
- Any room will have all high touch surfaces cleaned and disinfected after each use for a class, rehearsal, lesson, etc.
- All bathrooms will be disinfected after every activity

Summer Camp Protocols

- Ventilation will be enhanced as much as possible in any space through the use of any or all of the following methods, when available:
 - Opening windows
 - Use of fans
 - HVAC air circulation systems
- The full building will be deep cleaned after each camp day
- All bathrooms and high touch surfaces will be disinfected in intervals throughout the camp day

DISTANCING & REASONABLE CONTACT REDUCTION

- Every effort will be made to keep unique groups, or “pods” as independent as possible to encourage reasonable contact reduction and reduce exposure risk.
- Every indoor room will be measured and have capacities implemented to ensure social distancing is achievable as determined by current CDC recommendations.
- Efforts will be made to keep all individuals socially distanced in a space when possible.

HYGIENE & SYMPTOM MITIGATION

- Anyone who enters Wolf PAC must either wash or sanitize hands upon entry
- Enhanced hand washing and sanitizing will be performed throughout the day
- Anyone who enters Wolf PAC must confirm a health attestation of the following:
 - Is your body temperature below 100.1 degrees?
 - Have you been exposed to anyone with COVID-19?
 - In the past 14 days, have you had any of the following symptoms:
 - Cough
 - Fever
 - Sore throat
 - Loss of taste and smell
 - Nausea, diarrhea, vomiting
 - Extreme headache, fatigue, or muscle/body aches
 - Shortness of breath or difficulty breathing
 - Congestion/runny/stuffy nose

EXPOSURE PROTOCOLS

WHAT IS CONSIDERED "EXPOSURE"?

You are considered "exposed" to someone with COVID-19 if any of the below qualifications are met:

- You were within 6 feet of someone who has COVID-19 for a total of 15 minutes or more within 1-3 days of them receiving a positive COVID test or when symptoms first appeared (whichever came first)
- You provided care at home to someone who is sick with COVID-19
- You had direct physical contact with the person with COVID-19 (hugged or kissed them)
- You shared eating or drinking utensils with a person diagnosed with COVID-19
- The person with COVID-19 sneezed, coughed, or somehow got respiratory droplets on you

WHAT TO DO IF AN INDIVIDUAL IS EXPOSED TO SOMEONE DIAGNOSED WITH COVID-19:

If the individual is FULLY VACCINATED

If an individual is fully vaccinated, meaning two weeks out from the second dose of a two-dose vaccination series or two weeks out from a one-dose vaccination series, OR if they have had a positive case of COVID-19 within the past three months of the exposure:

- IF NO SYMPTOMS ARE SHOWN:
 - The individual may continue to attend activities
- IF SYMPTOMS ARE SHOWN:
 - The individual may not return to activities until quarantine protocols (see below) have been met

If the individual is UNVACCINATED

- The individual will not be allowed to return to Wolf PAC activities until quarantine protocols (see below) have been met

QUARANTINE PROTOCOLS IF AN INDIVIDUAL IS EXPOSED TO SOMEONE WITH COVID-19:

If quarantine is required because an individual has been considered to have an exposure (see qualifications above) to someone with COVID-19, that person will not be allowed to return to Wolf PAC until at least ONE of the following criteria has been met:

- Individual produces a Covid test taken from 5-8 days after exposure occurred with negative results.
 - Wolf PAC will request a copy of the negative test result before individual returns to activities.
- An individual chooses not to get tested and has quarantined for a minimum of 10 days since exposure and has shown no symptoms of COVID-19.

COVID-19 DIAGNOSIS PROTOCOLS

IF AN INDIVIDUAL CONTRACTS COVID-19:

If an individual contracts COVID-19, they must notify Wolf PAC immediately.

If an individual contracts COVID-19, they will not be allowed to return to Wolf PAC activities until ALL the following quarantine protocols have been met:

- If it has been at least ten days after symptoms first appeared or the positive diagnosis
- The individual is fully asymptomatic
- The individual has had no fever for a minimum of 24 hours without the use of medication

SUMMER CAMP 2021: MY CAMPER MUST QUARANTINE – WHAT HAPPENS NOW?

IF ONLY YOUR CAMPER IS QUARANTINING:

If your camper must quarantine due to a COVID-19 exposure or positive diagnosis, they will be unable to return to camp until all quarantine protocols have been met (see criteria in above section). We will assess each situation as it arises, and may ask campers to participate for parts of the day virtually (zoom in electronically to rehearsals/activities when possible). This way, any camper who needs to quarantine will be up-to-speed once they are able to return to camp. We encourage all campers to get tested as soon as they are eligible, so they can return to camp as soon as possible.

IF AN ENTIRE CAMP GROUP MUST QUARANTINE:

If an entire camp group must quarantine because of a positive COVID-19 case, we will transition the camp day online during the quarantine period until campers are able to come back on-site after quarantine protocols have been met. We encourage all campers to get tested as soon as they are eligible, so they can return to camp as soon as possible.

Wolf PAC recognizes that there may be a situation that fits into more of a 'gray area' than the two notated here. We will communicate with families if/when needed and create a plan that allows campers to continue participating in our camp day in some capacity.
